Dr **Gun Forsander**, MD PhD is a paediatric diabetologist and since 2003, the Head of the Paediatric Diabetes Clinic at The Queen Silvia Children's Hospital at the Sahlgrenska University Hospital in Gothenburg, Sweden.

Gun has been a specialized paediatrician since 1985. The title of her thesis at Karolinska Institute, Stockholm year 2000 was 'Clinical Management of Children with Diabetes Mellitus- A prospective, randomised psycho-educational intervention trial'. The current research area is transition, treatment of small children less than 7yrs according to physical activity, hypoglycaemia and nutrition and psychosocial support at the diagnosis of diabetes. Several studies on etiology and prevention of Type I DM are also performed at the clinic. Gun is the ex-president of the Swedish Paediatric Society of Endocrinology and Diabetes and has been a member of the Advisory Council of ISPAD. She is one of the authors of the National Guidelines of Paediatric Diabetology in Sweden and is involved in the writing of the new ISPAD Guidelines.

Gun is the mother of four children and one of her new hobbies is sailing.
